TECHNICAL SKILLS

CYBERSECURITY

- Penetration Testing
- Vulnerability Assessment
- Incident Response
- SIEM (Wazuh / Graylog)
- Cyber Defense
- Web App Security
- Firewall Management
- Ethical Hacking
- Network Security

INFRASTRUCTURE

- Linux Administration
- Kubernetes
- Docker
- Cisco Networking
- VMware
- Microsoft Azure
- SSO / Active Directory
- DNS / DHCP
- VPN / Routing

TOOLS & PLATFORMS

- Burp Suite
- Google Workspace
- Microsoft 365
- SAP
- Sangfor NGAF
- Git

LANGUAGES

- Bahasa Malaysia
- English

PROFESSIONAL CERTIFICATIONS

- SCOA — Sangfor Certified Operations Associate (NSF)
Sangfor Technologies | Valid until Jul 2028
- Practical Web Application Security & Testing
TCM Security | Jun 2024 | 9 CEU Hours
- Introduction to Cybersecurity
Cisco Networking Academy | Jun 2024
- UMCYBER_TC — Unmasking Cybersecurity
Trainocate / CompTIA | Aug 2024
- Fortinet NSE 1, 2 & 3 — Network Security Associate
Fortinet NSE Institute | 2020 — 2023
- Independent Security Research
Web Application Vulnerability Discovery & Reporting

MUHAMMAD SYAZMI HAFIZ BIN SHAHARIN

IT SECURITY & INFRASTRUCTURE SPECIALIST

Results-driven IT professional with 6+ years of experience in cybersecurity, network infrastructure, and system administration. Currently IT Assistant Officer at UniSZA, leading security assessments, SIEM deployment, firewall management, and cloud integration. Demonstrated expertise in identifying critical vulnerabilities through penetration testing and proactive threat analysis.

PROFESSIONAL EXPERIENCE

- Universiti Sultan Zainal Abidin (UniSZA)

Information Technology Assistant Officer

Apr 2022 — Present

Conduct comprehensive security assessments across IT systems, network infrastructure, and applications to identify vulnerabilities and implement appropriate mitigation measures

Design, configure, and maintain firewall policies and security controls to strengthen internal and external network protection

Administer and support enterprise Google Workspace environments, including account, access, and collaboration services for large student and staff populations

Manage and optimize core DNS and DHCP services to improve network performance, availability, and service reliability

Plan and implement Microsoft Azure and Single Sign-On (SSO) integrations to strengthen centralized authentication and access management

Develop and maintain system integrations to streamline authentication, communication, and operational workflows across multiple platforms

Implement and manage Telegram Connect integrations to improve internal communication and notification workflows

Administer Microsoft Outlook and email transport services, ensuring reliable and highly available organizational communications

Manage Linux-based server environments across various distributions, including Ubuntu, Debian, Fedora, CentOS, Rocky Linux, AlmaLinux, and other enterprise Linux platforms

Deploy and maintain containerized workloads using Linux Containers (LXC) and Kubernetes to support scalable and efficient application environments

Administer server infrastructure and system services with a focus on availability, performance, security, and operational continuity

Perform system monitoring, troubleshooting, incident response, and root-cause analysis for network, server, email, authentication, and security-related incidents

Support infrastructure integration and deployment activities, ensuring compatibility, stability, and effective coordination between systems and services

Maintain technical documentation, configuration records, and operational procedures to support consistent IT service delivery and infrastructure management
- CJ Korea Express Sdn. Bhd.

Senior Assistant

Sep 2020 — Apr 2022

Provided technical support and endpoint maintenance to ensure reliable day-to-day IT operations within a logistics environment

Managed email-related systems and user support, resolving technical issues and maintaining operational continuity

Administered high-volume printing and labeling processes, ensuring accuracy and timely execution for logistics operations

Coordinated local delivery planning and routing activities based on inventory availability and operational requirements

Maintained and verified operational data within SAP ERP to support accurate tracking, reporting, and inventory processes

Ensured adherence to established IT, operational, and security policies across the working environment

Assisted in troubleshooting hardware, software, network, and user-related issues to minimize operational disruption

Coordinated with internal teams to resolve technical and operational issues within required service timelines
- TGS Enterprise Network Sdn. Bhd.

Network Engineer

Jul 2020 — Sep 2020

Managed and supported enterprise IT infrastructure, including server environments, Cisco switching and routing infrastructure, VPN services, and network connectivity

Configured and maintained network infrastructure to support reliable and secure connectivity across customer and corporate environments

Served as a technical escalation point for complex infrastructure, network, and connectivity issues involving corporate clients and business partners

Performed troubleshooting and root-cause analysis across network, server, virtualization, and connectivity-related incidents

Deployed and administered VMware virtualization environments to improve server resource utilization and infrastructure efficiency

Managed IT asset lifecycles, including asset deployment, tracking, documentation, maintenance, and replacement

Collaborated with project managers and technical teams on infrastructure deployments, capacity expansion, system upgrades, and lifecycle management

Coordinated hardware replacement, logistics, and installation activities with commercial and technical stakeholders to ensure timely project execution

Supported infrastructure planning and technical implementation activities based on customer requirements and operational objectives

EDUCATION

- Bachelor of Computer Science (Hons.) — Data Communication & Networking

MARA University of Technology (UiTM)

March 2018 — August 2020
- Diploma in Computer Science

MARA University of Technology (UiTM)

May 2015 — January 2018
